	Responsibilities: <ul style="list-style-type: none">- Build projects with ReactJS and NextJS.- Break down tasks and planing weekly work for my self.- Collaborated with back-end developers to ensure seamless API integration and data exchange.- Developed new features based on project specifications and requirements.- Worked with designers and business analysts to implement user interfaces and functionalities that align with business objectives.

PROJECTS

01. Membee Merchant Admin Web (02/2023 - 03/2025) - Front-end developer
<p>Project Summary:</p> <ul style="list-style-type: none">- Worked on a comprehensive business management system, handling multiple modules including clients, loyalty points, news, vouchers, products, orders, agencies, and employee management,..- Integrated external platforms such as Zalo ZNS, Zalo OA, Tomaketer, ViHat, and Incom to enhance communication and automate workflows.- Configured automated notification systems via Zalo ZNS, Zalo OA, and SMS, significantly improving customer engagement and operational efficiency. <p>Responsibilities:</p> <ul style="list-style-type: none">- Developed new features based on project specifications and requirements.- Break down tasks and planing weekly work for my self.- Regularly updated, optimized, and fixed bugs to enhance application performance and stability.- Developed new features based on project specifications and requirements.- Collaborated with back-end developers to ensure seamless API integration and data exchange.- Worked with designers and business analysts to implement user interfaces and functionalities that align with business objectives. <p>Technologies:</p> <ul style="list-style-type: none">- ReactJS, NextJS, TypeScript Tailwind, Shadcn/ui, SASS, Material UI.
02. Membee Mini App (03/2024 - 07/2024) - Front-end developer
<p>Project Summary:</p> <ul style="list-style-type: none">- A web application accessible via Zalo Mini App, enhancing user convenience on the Zalo platform.- Integrated Zalo account login for seamless authentication and user access.- Key features including: placing orders, viewing news, checking reward points, redeeming vouchers, and more. <p>Responsibilities:</p> <ul style="list-style-type: none">- Researched and applied Zalo Mini App CLI, API, and Component libraries to understand and utilize the Zalo Mini App development ecosystem..- Integrated Membee API and Zalo Mini App API for seamless data synchronization and an enhanced user experience.- Collaborated with UI/UX designers and backend developers to convert design specifications into functional, responsive interfaces with efficient API handling. <p>Technologies:</p> <ul style="list-style-type: none">- ReactJS, Recoil, TailwindCSS, Zalo Components, Zalo CLI,...

03. MemBee Shopify Admin App (08/2024 - 10/2024) - Front-end developer

Project Summary:

- Developed a Shopify-embedded web application installable via the Shopify admin interface, enabling businesses to manage customers and products—functioning similarly to a Merchant Admin Portal.
- But the application was operational for a period before being discontinued due to business direction changes

Responsibilities:

- Researched and applied Remix, Shopify Polaris, and the architecture for building embedded apps within the Shopify Admin Dashboard.
- Collaborated with the back-end team to integrate Membee API and Shopify API, enabling synchronized customer and product data.
- Worked with the design team to ensure UI components adhered to Shopify Polaris design guidelines for a native admin experience.
- Built reusable UI components to maintain design consistency and boost development efficiency.

Technologies:

- ReactJS, RemixJS, TailwindCSS, Zustand,...

04. My Portfolio

Project Summary:

- Live: <https://nvt-portfolio.vercel.app/>
- Github: <https://github.com/tainv1101/nvt-portfolio>
- Built with Next.js 15 and responsive across various screen sizes.
- Serves as both a personal portfolio and a learning environment for exploring new technologies.
- Front-end only project using open/public APIs; no backend or private services involved.
- Actively maintained and continuously improved as part of long-term personal development.
- Includes two main sections:
 - Portfolio: Showcases personal information in both English and Vietnamese (has new version but just only English).
 - Practice: A sandbox for experimenting with React.js, Next.js features, and other libraries.

Responsibilities:

- Researched and applied new technologies and new library.
- Fix bugs, update, optimize the project.

Technologies:

- Next.js 15, ReactJS, TypeScript, TailwindCSS, Zustand, React Query, React Hook Form, React-window, Zod, Gsap (Scroll Trigger) ,...
